NEVADA CON. IS NOT ALL SURFACE

Vice-President Requa States Thousands of Feet Developmen Work Done.

LABOR TROUBLE IS DELAYING RAILROAD

Management Will Have Affairs of Road Untangled Within Few Days.

The general public has heard so much regarding the wonderful surface showings of the Nevada Consolidated company's ground in the Ely district, that this property has almost been considered from no other standpoint. That there are several thousand feet of development work already accomplished by the Ne-vada Consolidated company is vouched for by M. L. Requa, the vice-president and general manager of that company,

Having Delay With Railroad.

Mr. Requa arrived in Sait Lake Monday evening from Ely, and reports that everything is progressing rapidly with the exception of the railroad. On account of trouble with the labor employed in building this road the company is not making the headway anticipated. Mr. Requa, however, states that within the next few days this trouble will be adjusted, and everything will be proceeding as desired. Within the present week the company will have the road completed as far as Curry's ranch, and within the month the road will be open for business to that point.

To Grade Smelter Site.

Mr. Requa states that there is nothing new at fily, as the entire camp is awaiting the railroad, and machinery and supplies of all descriptions, and to an almost inconceivable extent, can not be moved into fily until the road is completed. Mr. Requa states that the company at present is getting ready to let the contracts for grading the smelter site, and this is expected to be done within the very near future.

Much Development Done.

Much Development Done.

Of the development work that is being done on the property, he states that the management is endeavoring to complete the connection between the Star Fointer and Ruth shafts without any delay, as this will enable the more expeditious handling of the Ruth ores. There are four levels on the Ruth mine, the deepest being to the 69-foot level. From this point there has been considerable work done, and there are blocked out in the mine at present enough ores to provide ample food for the plants of the company for the next ten years.

Mr. Requa will be in the city for the week before leaving again for Ely.

STRIKE ON VIRGIN RIVER.

New Orleans Cotton Capitalists Have Backed a Mining Man.

Backed a Mining Man.

Special to The Tribune.

CALHENTE, Nev., May 8.—George Walmouth and Frank Ennis, owners of the Diamond group of free gold claims on Virgin river, brought in some magnificent samples of ore talken from the bottom of a 56-foot shaft sunk at the river side a their Ruby claim. They sunk on a four-inch vehn of high-grade ore going 383 per ton. This vein widened until they reached a depth of fifty feet, when it opened out into the full width of the shaft, but drooped down in value to \$23 per ton gold. Six foet deeper the vein pinched to two feet, but showed coarse free gold in every inch, going up to \$463 per ton free gold. On this vein they are now sinking, and when they reach the 190-foot level they will crosscut and drift. They have seven claims in this group and have recently been offered a big price for the group, but refused the offer. They are backed by New Urleans cotton capitalists, who have recently gotten into the southern Nevada fields. The contact is quartizite on both sides of the ledge and the walls themselves carry low-grade gold values.

A goof strike of gold-sliver ore is reported today from the Green Mountain Boy mine, west of Caliente and south of De Lamar. The owners, Foote, Richards & Blake, have drifted 140 feet on a 25-inch vehn of \$43 ore, and encountered at the breast of the drift a blind lead showing value of \$132 gold and sliver in a three-foot vein. They are sacking this ore for a test shipment to Sait Lake, and have refused a big offer from George Wilson, representing Tonopah capitaliste, for the claim.

F. R. McNamee, attorney for the Bamberger-De Lamar Mining company, passed through camp this week en route to Bait Lake. He reports developments at his company's mines as very encouraging, constant bullion shipments going to the mint, and the grade and size of ore bodies increasing with every foot of development.

Maynard and Lemolne returned from their trip to the De Lamar district yesterday and report encouraging results from development work on their locations sou to The Tribune.

SCHWAB GETS MOLE TIME.

Twenty Days' Extension Granted to the Gold Bar Option.

Owing to the unsettied condition of the financial market following the San Francisco disaster the option held by Charles M. Schwah on the Bullfrog Gold Barmine, which was to expire on April 20, and which involves a million and a half of dollars, has been cointinued for twenty days.

Salt Lake Security & Trust Co.

IN OUR OWN BUILDING, 32-34 Main Street.

HAS LARGE INTEREST IN THE SHOSHONE

Secretary of Original Company Passes Through Salt Lake From Bullfrog.

J. C. Connor, the Colorado Springs mining man and capitalist who has been prominently connected with the famous shoshone property of Bullfrog, serving as secretary of the Montgomery Shoshone ompany up to the time of Schwab's purchase, passed through Salt Lake Tuesday from Nevada. Mr. Connor is ne of the heaviest stockholders in the new Shoshone company, and is among the nost thoroughly acquainted persons with that property.

Has Seen Mine Grow.

For the past year Mr. Connor has been one of the most faithful attendants upon the developing of the Shoshone, and has had the pleasure of watching the mine grow from a \$200,000 proposition to one which many millions could not secure. About a year ago Mr. Connor bought an interest in the original company with Malcolm Macdonald.

Has Faith in Bullfrog.

Mr. Connor is one of the most enthusiastic friends that the Builfrog mining district has, and expresses the utmost confidence in the future of that
great region. The district is looking better than ever, and growing daily in richness and promise. Mr. Connor has
numerous friends in Salt Lake, many of
whom are old-time stockholders in the
Montgomery Shoshone company.

DAY ON 'CHANGE.

Strong Market Continues With Sales of Stock Well Distributed.

Tuesday was a strong day on the local exchange. There was a total of 47,150 shares sold during the day, representing a market value of \$87,24.25. Nevada stocks shared honors with those of Utah, and while the latter held firm the former gained in many instances over the quotations of the previous day.

Sales were well scattered along the board. The quotations for the day closed as follows:

NEW COMPANY IS FORMED IN NEVADA

Salt Lakers Incorporate Little Mug Group Mining Claims of Manhattan.

OWN FOUR CLAIMS FINELY SITUATED

Strong Official Family Named to Conduct Affairs for First Year.

Word has been received announcing the formation of the Little Mug Manhattan company, the articles of incorporation having been filed in the State of Nevada. This is the latest organization of Salt Lake capital for the purpose of operating in Manhattan, and the officials of the company for the coming year are as follows: President, J. E. Galligher, president of the Carisa company and president and manager of the Utah Mining Machinery and Supply company, vice president, David Kaufman, a preminent busi-ness man of Anaconda, Mont.; secretary, Joseph Omerndorfer, the prominent Salt Lake mining man, and treasurer, Harry B. Joseph, manager of the Carisa com-

Owns Seventy-Two Acres.

With such a strong official family to conduct the affairs of the company for the ensuing year, all of whom have had wide experience in the operation of mines, there is every reason to expect the first year to be not the least successful for the company. Four claims are owned by the Little Mug organization, each being 600 by 1500 feet, with a total net area of seventy-two acres. These claims lie adjoining the property of the Atlantic and Pacific groups, upon which a shaft now is down for a distance of seventy feet in milling ore. There is a large fron-quartz dike running through the Little Mug property, also cross fissures, all of which show pannings of free gold.

Confidence in Property.

Confidence in Property

Confidence in Property.

The organizers of the Little Mug company have every reason to anticipate that in the future history of Manhattan's greatness as a magnificent milling proposition they will have a property in their group of claims which will contribute to the shareholders most substantially. The location of the group is stated as being ideal, and its large ledge croppings upon intelligent development work speak eloquently of the nature of developments the company may reasonably expect.

The Cong Million Shares.

The company is incorporated for 1,690,-600 shares of a par value of \$1 each, of which 250,600 shares are to be pinced in the treasury for development purposes. The above named officials, with O. E. Carr, purchasing agent for the American Smelting and Refining company, will con-stitute the board of directors for the first year.

For One Million Shares.

GUGGENHEIMS AND COPPER.

Mining Engineer Sees Future Dominance in Red Metal Field.

mining Engineer Sees Future Dominance in Red Metal Field.

A New York mining engineer, familiar with the plans of the Guggenheims in copper, says in the New's Bureau.

"The Guggenheims expect within two or three years to control fully 250,00,00 pounds of copper production, or 15 per cent of the world's copper output, and they expect to develop this copper production from the Bingham and Ely camps, which do not at present cut much figure in the copper world. The Guggenheim group at present consists of three properties, the Nevada Consolidated, Utah Copper company and the Cumberland & Ely property. These properties the Guggenheims control and they are the only copper properties they do control in the United States.

"They figure that by 1907 the Utah Copper company will be producing at the rate of 50,000,000 pounds of copper per annum, and the Nevada Consolidated at the rate of 60,000 pounds, and that by 1908 the production will be as follows in pounds: Nevada Consolidated. 100,000,000; Utah Copper company, 70,000,000; Cumberland & Ely, 30,000,000. The Guggenheim policy is to open up new big low-grade deposits, and the only known large deposits of copper-bearing ores lie in the porphyry belts at Bingham and Ely.

"I do not believe, however, that the Guggenheims will be content with these properties. I anticipate that they will secure the control of the Boston Consolidated, which is a very similar proposition to that of the Utah Copper company, and, with the Boston Consolidated which is a very similar proposition to that of the Utah Copper company, and, with the Boston Consolidated as they are in the Ely camp. The Guggenheims also have large copper interests in Alaska. They are already preparing to build a smeiter in that country. Within a few years I expect the Guggenheims to control at least 25 per cent of the world's copper production, which would make them a greater factor in the copper world than the Amalgamated Copper company now is:

Ore Shipments.

The Pioneer Sampler released the following number of cars of ore Tuesday: Tintic, 4; Bingham, 1; Nevada, 3 The Taylor and Brunton Sampler released the following: Idaho, 8; California, 1; Bing-ham, 2; Tintic, 12.

Ore and Bullion.

The ore and bullion receipts for Tuesday, given by McCornick & Co., were as follows: Ore, \$33,000; bullion, \$26,000; gold, \$20,000.

TONOPAH MINE IN SPLENDID CONDITION

Annual Report Discloses Most Ideal Conditions Prevail in the Mine.

The Tonopah Mining company, the ploneer in Nevada companies, whose efforts in a new field have done not a little to establish the present magnificent state of conditions now existing in Tonopah and all Nevada, has issued its annual report for the benefit of the stockholders. By it it is seen that during the year just passed the company has done a total of 6147 feet of work underground, making a total of development work to date of 27.755 feet.

Enormous Ore Tonnage. Enormous Ore Tonnage.

Large bodies of high-grade ore have been opened up during the past year, and the company's resources added to enormously. A total of 59.00 tons of ore were holsted to the surface, and 43,543 tons were shipped, of which 1785 tons were in transit at the time of writing the report. From the smelter returns on 45,692 tons of ore the sum of \$1,461,856 was realized, the yield a ton being about \$12. The receipts for the year were \$2.181,275.65, and after the payment of necessary expenses a million dollars for dividends, the company had cash on hand February 23 to the amount of \$424,809.65.

Mill Under Construction.

Mill Under Construction.

The following excerpt from the report will be of interest.

"The mill which is under construction should be completed about the first of August. The unusually low temperature of the winter months necessitated the postponing of the construction of the foundations and the consequent delay in erecting the battery of stamps. The capacity of the mines to produce has been much beyond the present capacity of the smelters to reduce the ores, but smelters are being erected, and with the consumption at the mills during the present year the tonnage shipped will be much increased. The following excerpt from the report

Regarding the Railroad.

Regarding the Railroad.

"On November 1, 1905, the Tonopah railroad, which had been broad-gauged and re-equipped, was amalgamated and consolidated with the Goldfield railroad under the name of the Tonopah and Geldfield Railroad company, upon terms which were deemed advantageous to your company's interests, and as one of the results the first mortgage bonds of the Tonopah Kailroad company, which bore the guarantee of your company, which bore the guarantee of your company, which bore the guarantee of your company will be retired and canceled, relieving your company of all liability in the future. A considerable portion of the cost of relaying the track of the former Tonopah Kailroad company with heavier rails was also provided. The relaying is progressing as rapidly as rails can be obtained from the steel mills.

Dividends to Continue.

Dividends to Continue.

Because of the necessity of large ex-penditures in widening the roadway changing the gauge and re-equipping the railroad no revenue has yet accrued to

The Nevada Copper company, "The Nevada Copper company, which your company controls, is developing a copper deposit which it is expected will prove of great future value as a flux for your company's ores. Your board feit justified in declaring and paying quarterly dividends of 25 cents per share beginning with April. 1965, and unless some cause new unforseen should arise there is no reason to suppose that they may not be continued and increased as soon as a greater tonnage of ore now swalting breaking and shipping can be converted into funds for distribution.

"The board desires to commend the efficiency of the company's general manager, Mr A F Keith, and his staff."

GOOD NEWS FROM ST. IVES.

Goldfield Property Shows Ores Resembling Those of the Florence.

Stockholders of the St. Ives company will be interested in the recent development on that Goldfield property. On the Z0-foot level high-grade are has been encountered that bears a close resemblance to the area of its great neighbor, the Florence. The pay streak was first found on the 150-foot level, and with the additional hundred feet gained there has been a most marked improvement in the shoot in every way.

a most marked improvement in the shoot in every way.

While it is too early to make any estimates of the amount and value of the ores in the St. Ives, there is an enormous amount of high-class rock exposed, and the company is sacking the ore for shipthoroughly exploring the body on both the 150 and 250-foot levels.

BIG CHIEF TO THE FRONT.

Malcolm Macdonald's Manhattan Property Showing Up Finely.

Those fortunate ones, both in Utah and Nevada, who have followed the lead of Malcolmn Macdonald, the Nevada operator whose successes have come fast and furious over since his Shoshone venture, will be interested in the report that has been issued by the Big Chief Mining company of Manbattan, of which Mr Macdonald is vice-president and general manager.

denald is vice-present ager.

Fifteen miners are employed in opening up the property, and from all indications the company has one of the best propositions in the district. There are many tons of shipping ore in sight in the mine, and a large tonnage of milling ore is in readiness for the mill that is being erected by the Little Gray Mining company.

ORE IN THE BLIZZARD.

Maj. Stanton Encounters Good Ore in His Goldfield Mine,

in His Goldfield Mine.

Maj Stanton the well-known Salt Laker who has been enjoying an unparalleled season of successes in the Nevada mining districts, has again struck it rich in the Bilizzárd property, which is in his charge at this time. The ore is a silicious quartz, carrying sulphides, and carries some very fine gold and silver values.

Assays have been made of this ore and the highest yet secured in gold was \$21.00, and 18.36 ounces of silver. The owners of the Bilizzard have not offered their stock on the market, having taken the treasury stock up themselves in order to provide funds by which the mine might be developed.

DEAL IS CONSUMMATED.

Blair Mines Sold in East for Large Sum of Money.

Word has been received in Sait Lake from M. L. Effinger, now in New York, that the deal involving the ownership of the famous old Blair mines at Sliver Peak, Nev., has been successfully consummated. The successful termination of this deal marks it as one of the largest of the year for that hone of great mining transactions, the amount involved being in the neighborhood of \$150,000. This transaction was being watched with the keenest interest by Sait Lake and Nevada interests.

The Metal Market.

The metal quotations for Tuesday show a decided increase in the prices. They are as follows: Silver, 66%c; lead, 35.44; copper, 18%c.

Boston Copper Letter.

James A. Pollock & Co furnish the follow-ing copper letter from Boston, received over their private wire.

"The Boston market continues strong and active. North Butte was the feature at the opening, closely followed by Old Dom. Daly West. Royale, U. S. Smelting, Bingham and Utah Con, all of which made good gains and held their prices until the close. There was more or less manipulation to be seen in some

Sciatica Cured After Twenty Years of Torture.

For more than twenty years Mr. J. B. Massey, of 3322 Clinton St., Minneapolis, Minn., was tortured by sciatica. The pain and suffering which he endured during this time is beyond comprehension. Nothing gave him any permanent relief until he used Chamberlain's Pain Balm. One application of that liniment relieved the pain and made sleep and rest possible, and less than one bottle has effected a permanent cure. Mr. Massey relates his experience for the benefit of others who may be similarly afflicted. If troubled with sciatica or rheumatism why not try a 25-cent bottle of Pain Balm and see for yourself how quickly it relieves the pain. For sale by all leading drug-
